

Introductory Web Design Series

Build a Website from Start to Finish

by

LearnWebDesignOnline.com

Version 1.0.1 dated Dec 12, 2006

All material is copyrighted. You may not sell or distribute without permission. Instructors can use these lessons as the basis for their classes and can make photocopies of selected portions for educational purposes. Students are encourage to obtain their own eBook from LearnWebDesignOnline.com

In the lessons, you will find links to source code and live pages which will require an internet connection to access.

We would appreciate the help in improving future versions by informing us of typos and errors as you find them. We can be reached from our website at www.LearnWebDesignOnline.com

The step-by-steps lessons and screen shots used in this book were based on Version 8 of Dreamweaver and Fireworks.

You can get the full versions of **Dreamweaver 8** and **Fireworks 8** from amazon.com as linked above. Or you can get the **Studio8** bundle which contains the two products. If you want the bundle that contains Photoshop as well, take a look at “**Creative Suite CS2 Premium Web Bundle with Macromedia Studio 8**” for the **PC** or **Mac**

The upgrade versions of **Dreamweaver**, **Fireworks**, and **Studio8** are as linked here as well.
